Taking a Proactive Approach to Safety at EthosEnergy with Ansell **GUARDIAN**®

Background: EthosEnergy & Ansell Partnership

- Operating in the power, oil & gas, industrial and aerospace markets, EthosEnergy's customers depend on them to deliver services and solutions to make energy affordable, available and sustainable.
- With a workforce of 3,700 operating in over 100 countries, the company recognizes that success is tied to its ability to achieve world-class safety performance at its manufacturing facilities.
- EthosEnergy works to improve performance across the value chain, not least of which includes the safety of its workforce. They remain vigilantly focused on new, better, more efficient and safer methods of working, and business partners like Ansell help to support this objective.

Safety Need

Workers at EthosEnergy manufacturing sites require protection from a variety of hazards, including sharp materials and other risks. If not addressed properly, sharp objects can cause lacerations to the hand or arm.

Key Business Objectives

- 01** Align with corporate initiative for a complete and standardized PPE program
- 02** Reduce injuries and the costs associated with those injuries
- 03** Provide proper hand protection for the tasks and applications at the facility

Guardian Results:

Estimated Savings at Massachusetts location:

\$25,000

IN INJURY REDUCTION*

\$43,000

IN PPE LONGEVITY**

INCREASED COMPLIANCE AND IMPROVED **SAFETY STANDARDS**

* Based upon injury industry averages and the estimated cost savings associated with injury reduction.

** Based upon market pricing associated with the proper PPE recommendation, including longevity of the PPE.

Ansell Recommended PPE Solutions

HyFlex® 11-280

Cut-resistant sleeves that deliver superior protection and advanced comfort

HyFlex® 11-931

Ultralight, palm-coated cut-resistant and oil-repellent work gloves

HyFlex® 11-757

Durable lightweight industrial gloves, combining advanced cut resistance with superb comfort

TouchNTuff® 92-600

Gloves providing an unparalleled combination of chemical splash protection, comfort and durability

Ansell**GUARDIAN**® Safety Assessment

- > In July 2022, Ansell conducted an Ansell**GUARDIAN**® safety assessment at EthosEnergy’s Massachusetts manufacturing location. A key objective of the assessment was to find ways to reduce hand and arm lacerations for employees working with sharp materials onsite.
- > Through glove and sleeve testing, the assessment identified solutions which enabled workers to safely complete their required tasks while driving worker acceptance and compliance with their new PPE; ultimately reducing injuries.

Guardian Results:

ANSELL PPE EXPANDED TO

37 LOCATIONS

Results

- 01 EthosEnergy’s management team was impressed with the level of detail provided to achieve their safety objectives.
- 02 EthosEnergy extended Ansell**GUARDIAN**® assessments to three further manufacturing facilities.
- 03 They now use Ansell as their primary vendor for gloves at all 37 of their U.S. locations.
- 04 Workers are now better protected from hand and arm lacerations, reducing injuries and increasing compliance.
- 05 EthosEnergy continues to leverage Ansell’s PPE to reduce injuries and improve performance, including:
 - HyFlex® 11-280
 - HyFlex® 11-931
 - HyFlex® 11-757
 - TouchNTuff® 92-600
