IMPROVED FORTIX™ TECHNOLOGY

Industrial workers need long lasting and comfortable gloves to get the job done both efficiently and most importantly, safely. Through our advanced proprietary Ansell technologies, we help to reduce worker risks and injuries, leading to safer, more protected workplaces.

IMPROVED FORTIX™ TECHNOLOGY FOR IMPROVED ABRASION RESISTANCE

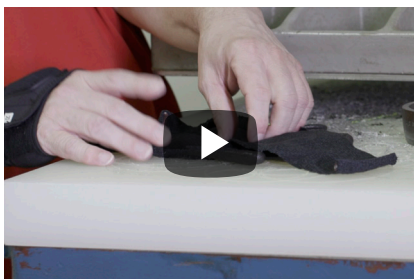

For industrial workplaces where abrasion risks and hazards are present, the improved formulation of our FORTIX™ foam nitrile coating provides enhanced abrasion resistance and increases grip and breathability of the glove. The increased performance not only makes it possible to significantly extend the longevity of the glove but also to strengthen the comfort of those who wear it.

PRODUCTS VS. THE COMPETITION

At Ansell, we are constantly striving to improve our product performance by integrating innovative technologies focused on the user needs. The videos below clearly demonstrate our unique points of differentiation vs the competition.

PERMANENCE TESTS

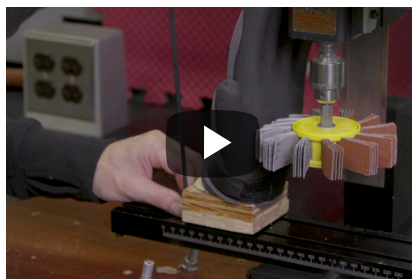

"Glove longevity relates directly to its durability"
