CONNECTED WORKPLACE SAFETY SOLUTIONS

**Wearable
Technology**

Wearable sensor technology for the hand and wrist that provides real-time, measurable and actionable data that helps reduce risky movements that can lead to work-related musculoskeletal disorders.

Visibility

A new safety service provides visibility about hand and wrist movements through data and analytics.

**Reduce Risky
Movements**

Reduce risky hand + wrist movements up to 20% within 3 months.*

*Validated by over 2,000 people within a recent study amongst a leading eRetailer

MOTION SERIES

HAND & WRIST SAFETY

Inteliforz™ Connected Workplace Safety Solutions

See Beyond The Obvious

What **IF**
you could...

- Anticipate the invisible risks impacting your workforce?
- Use real time data to create a smarter and safer workplace?
- Empower workers through a connected workforce?

Inteliforz™ Connected Workplace Safety Solutions identify risky hand and wrist movements to mitigate workplace injuries

AWS Cloud-Hosted

Inteliforz™ data is sent securely to the cloud.

Proprietary Algorithm

Identifies over 1000 movements every hour. The proprietary algorithm captures up to 27 hand and wrist motions every minute to assess risk.

Mobile App

Data and insights available so workers can view their movements and see safety recommendations.

Vibrant Color Light Display

Vibrant LED color indicator displays real-time movement stats.

Risk Assessment Scoring

Daily score of hand & wrist movements.

9D Inertial Measuring Unit

Includes internal accelerometer, gyroscope, and magnetometer.

Environmental Temperature Sensor

Enables utilization of device in a variety of conditions.

2.4 GHz Wifi Chip & 64MB Microprocessor

Drives the accelerometer, gyroscope and magnetometer data to gain insights 20 times a second in the flash memory.

Customizable Haptic "Buzz"

Remind workers about recommended hand and wrist movements.

12+ Hour Rechargeable Battery

Allows devices to be used throughout a shift and easily recharged.
