

# DE JUISTE SNIJBESCHERMING KIEZEN

## SNIJWEERSTANDSKLASSEN (EN 388:2016)

De EN ISO snijweerstandsklasse wordt in newton gemeten en loopt van 2 n (niveau A) tot 30 n (niveau F). Hoe meer gewicht er nodig is om door het handschoenmateriaal heen te snijden, hoe hoger de klasse. De volgende informatie biedt een leidraad voor het beschermingsniveau van enkele handbeschermingsoplossingen van Ansell.

| Weerstand (N)<br>Beschermingsniveau                                                                                                                                                                                  | A                                                                             | 2N<br>Minimale risico's                                                                                                                                                                                                                                                          | B                                                                                                                                                                                                                                            | 5N<br>Gemiddeld                                                                                                                                                                                                                                                                           | C                                                                                                                                                                                                                                                                                                              | 10N<br>Hoog                                                                                                                        | D                                                                                                                               | 15N<br>Hoog | E | 22N<br>Extreem | F | 30N<br>Extreem |
