

# VALG AF RIGTIG SKÆRBESKYTTELSE

## VURDERING AF SKÆRENIVEAU (EN 388:2016)

EN ISO-niveauet for skærbestandighed måles i Newton og går fra 2 N (niveau A) til og med 30 N (niveau F). Jo mere vægt, der kræves for at skære gennem handskematerialet, jo højere er vurderingen. I oplysningerne nedenfor kan du finde vejledning til beskyttelsesniveauet i nogle af Ansells sikkerhedsløsninger til hænder.

| Bestandighed (N)<br>Beskyttelsesniveau                                                                                                                                                                                                                                                                                                                                                                                                                                                |                       | A                                                                                                                                                                                                                  | 2N<br>Minimale risici                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | B                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 5N<br>Moderate                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | C                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 10N<br>Høje                                                                                                                                                                                                                                                                                                                             | D                                                                                                                                                                                                                                                                                                                                    | 15N<br>Høje | E | 22N<br>Ekstreme | F | 30N<br>Ekstreme |
