ANSELL LAUNCHES REVOLUTIONARY HYFLEX® ULTRA-LIGHTWEIGHT CUT PROTECTION SERIES: MAXIMUM SAFETY WITH UNMATCHED COMFORT AND DEXTERITY

30 October 2024, Brussels, Belgium — Ansell, a global leader in protection solutions, is proud to announce the launch of its latest innovation, HyFlex® Ultra-Lightweight Cut Protection Series, including our innovative new HyFlex 11-591 glove. Designed to meet the evolving needs of today's workforce, this groundbreaking line of gloves offers unparalleled cut resistance, comfort, and dexterity, ensuring that workers stay protected and productive throughout their workday.

A New Standard in Worker Safety

Workers who spend hours operating various tools and machinery face constant exposure to potential cut risks. Traditional gloves often force a compromise between safety and comfort, leading to challenges in maintaining protection for extended periods. HyFlex® Ultra-Lightweight Cut Protection Series eliminates this compromise, setting a new standard for worker safety.

Innovative Technology for Tailored Protection

Featuring INTERCEPT™ Cut Resistance Technology and Next Generation Single HPPE yarn, HyFlex® ULW series is 20% lighter* while delivering 2-12 times greater cut resistance**, all while maintaining unmatched comfort and flexibility. With EN ISO cut protection levels ranging from C to F+, workers can select the exact level of protection required for each task, ensuring both maximum safety and ease of movement.

Comfort that Lasts All Day

The ultra-lightweight design of this HyFlex® series ensures that workers can keep their gloves on throughout their entire shift without discomfort. Breathable, durable, and designed for all-day wear, these gloves allow for effortless transitions between tasks, eliminating the need for frequent glove changes. Additionally, the touchscreen compatibility feature means workers can operate tools and devices seamlessly, without the need to remove their gloves.

A Commitment to Worker Safety

"At Ansell, we understand that worker safety is non-negotiable," said Paul Tierney, VP Global Product Marketing at Ansell. "HyFlex® Ultra-

Lightweight Cut Protection Series is a testament to our commitment to innovation and worker protection. By combining advanced materials with thoughtful design, we've created a solution that not only keeps workers safe but also enhances their comfort and productivity.”

Available Now

HyFlex® Ultra-Lightweight Cut Protection Series is now available through authorized Ansell distributors and sales representatives in select regions. For more information about the product line or to request samples, please visit ansell.com/brands/hyflex or contact your local sales representative.
