Ansell Launches Expanded RightCycle™ Program to Help Industrial and Scientific Customers Divert PPE Waste from Landfills

OCTOBER 15, 2025, Iselin, New Jersey – Ansell, a global leader in safety solutions, today announced the launch of its expanded **RightCycle™ Program**. This enhanced sustainability initiative enables industrial and scientific customers to divert used PPE from landfills through recycling and a new energy recovery option using Alternative Engineered Fuels (AEFs)- a major step forward in environmental responsibility and innovation.

The RightCycle Program has evolved to meet the growing demand for landfill diversion in the PPE space. Market research sponsored by Ansell shows that **96% of PPE buyers** in industrial manufacturing say sustainability influences their purchasing decisions, with **52% stating it significantly impacts their purchasing decisions**. With more complex materials and contamination risks in industrial settings, the program now offers tailored landfill diversion services that include:

- **Recycling** of eligible cleanroom and scientific PPE.
- **Energy recovery** through AEFs for RightCycle eligible PPE used in industrial manufacturing settings with higher risk of contamination, transforming waste into clean-burning fuel for cement kilns and reducing reliance on fossil fuels.

“Our mission is to divert Ansell-branded PPE from landfill using the most responsible methods available,” said Nick Brown, Senior Director of Ansell Services. “Whether through recycling or energy recovery, we’re helping our customers achieve their zero-waste goals in ways that are both affordable and responsible.”

“By adding Energy Recovery through AEFs to our program, we can accept even more used PPE into the program and reach our goal of diverting over 1.0 million lbs. of used Ansell PPE from landfills in one year,” said Lisa Charles, RightCycle Program Leader for Ansell North America.

As part of this expansion, the program now includes a broader range of products such as:

- MICROFLEX™ and TouchNTuff™ branded nitrile gloves
- BioClean™ branded cleanroom gloves and apparel

- Nemesis™, Maverick™ and KleenGuard™ branded safety glasses and goggles

This is in addition to products already eligible from Ansell's Kimtech and KleenGuard branded PPE portfolios.

Ansell's collaboration with organizations like the **Jackson County Developmental Center** -a non-profit enterprise- adds both economic and social impact to the program. This partnership provides job training and life skills to disadvantaged workers while advancing waste diversion efforts.

RightCycle by Ansell is a first-of-its-kind landfill diversion program for nonhazardous PPE. Since 2011, The RightCycle Program has helped customers **divert 7 million lbs. of used PPE** from landfills. For more information, contact news@ansell.com.

About Ansell

Ansell (ASX: ANN) is a global leader in safety solutions and an integrated manufacturer of personal protection equipment for healthcare and industrial workplaces. Each day, over 10 million workers in more than 100 countries trust their safety to Ansell brands such as HyFlex, Ringers, MICROFLEX, TouchNTuff, GAMMEX, Kimtech, KleenGuard, and AlphaTec. Driven by a vision to lead the world to a safer future, the company continuously pursues new product and service innovations that predict, prevent, and protect against workplace risk while promoting sustainable sourcing and manufacturing.
