

The RightCycle™ Scientific Program Frequently Asked Questions

Q What is the RightCycle Program?

RightCycle is the first manufacturer-led recycling program for non-hazardous PPE including single-use apparel and accessories, masks, nitrile and latex gloves, protective eyewear, and flex-film packaging for Ansell branded products.

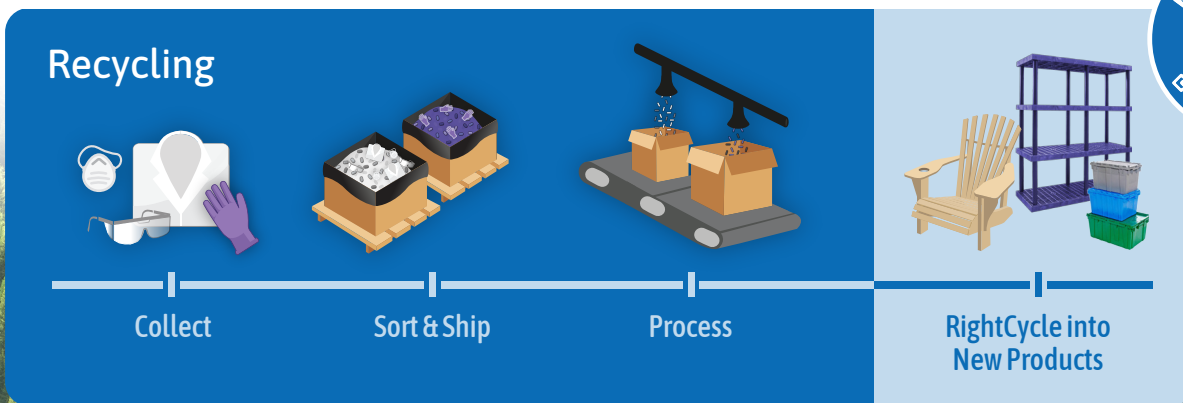

This groundbreaking service turns used PPE into new consumer goods such as lawn furniture, benches and bicycle racks.

The program was launched in 2011 and is currently available in 11 countries: the U.S., Canada, the U.K., Ireland, Germany, France, Belgium, Austria, Spain, the Netherlands and Switzerland. Since its inception, RightCycle has diverted 7.0 million pounds of waste from landfill.

Q How does the RightCycle recycling service work?

Implementation is easy. Customers collect qualifying Ansell PPE in their facilities. The items are then shipped to our recycling partners in a Gaylord box using the customer's preferred carrier. (See additional information about collection boxes and shipping below.)

Ansell branded PPE is converted into plastic pellets that are used to produce new consumer goods.

Q How do I enroll in RightCycle?

Email RightCycle@ansell.com to get connected with **WasteBits™**, a web-based platform that enables you to manage and monitor your waste diversion efforts online. Team members will walk you through the online registration process and help you obtain approval from our recycling partners. Registration and sign-up are typically completed within a 15-minute virtual meeting.

Please note: Only eligible Ansell branded products are accepted to ensure that they are suitable for recycling under the program. In addition, the products must not be exposed to hazardous contaminants or require special handling or disposal.

Q How can I ensure a successful implementation in my facility?

Implementation is easy! Your Ansell sales consultant can help by accompanying you on a site walk and advise you on the best places and ways to collect waste for the program. Our RightCycle Specialist can also walk you through the process and answer any questions that you may have. For information, email RightCycle@ansell.com.

Q Can I use my own boxes if I want to?

Yes. To be more sustainable, we encourage customers to use boxes or containers that are already available. We can provide labels, free of charge, to help identify the collection bins. If you do not have boxes, we can provide a limited number of RightCycle boxes for collection purposes.

Please note: The RightCycle boxes can only be used to collect used products. They are not to be used for shipping.

Q Can I collect different types of PPE in a single collection box?

For the most part, yes.

- You can co-mingle all PPE (except nitrile gloves) and flex-film packaging.
- Nitrile gloves must be segregated into a separate collection bin.

Q Can I recycle items that are not manufactured by Ansell?

No. You can only recycle Ansell branded products via RightCycle. These products have been tested to ensure that they will be recyclable through the program and provide a consistent output for manufacturers.

We cannot guarantee to our recycling partners that products from other companies will meet the required processing criteria.

Q Where can I get a full list of products that are eligible for RightCycle?

Contact your local Ansell sales professional for a list of eligible products.

Q Is there a cost to participate in RightCycle?

There is no cost to participate in the program. The only direct expense is that you must pay to ship your used products to our recycling partners, using your preferred carrier.

SHIPPING INFORMATION

Q How should I ship my used products to your recycling partners?

The best practice is to consolidate the used items from your collection bins into a Gaylord box on a pallet.

Please keep nitrile gloves separated from all other eligible Ansell branded PPE, shipping in its own box or Gaylord.

The contents of each box should be clearly marked on the outside, using the provided pallet labels.

The Gaylord must be secured to a standard wooden pallet and shrink-wrapped. The dimensions of a standard pallet are 40" x 48". Please refer to your carrier's weight and pallet guidelines for more information.

Q Do I need to do anything special to identify the pallet when I ship it?

You must log into your WasteBits account to notify us of the upcoming shipment. WasteBits will verify the shipping procedures, shipping address and assign a unique RC# that will be used for tracking shipments and waste diversion metrics.

Q Is there a way for me to reduce my shipping costs? Does RightCycle help pay for shipping?

While we do not pay for the cost of shipping, we do encourage customers to use [FreightCenter.com](https://freightcenter.com) if you don't already have a preferred carrier. Contact Cat Bowling at 800-716-7608, Ext. 1108, or send an email to Cbowling@freightcenter.com. Use promo code "RightCycle" for the best rates.

Q Where do I ship items for the RightCycle Program?

U.S. east coast, ship to:

JCDC
270 Jack Burlingame Drive
Millwood, WV, 25262, USA

U.S. west coast, ship to:

West Coast Consolidation
9460 North Virginia Street
Building B
Reno, NV 89506, USA

In Canada, ship to:

Ansell Canada c/o CDEC
800 Rue Sud
Cowansville, QC J2K 2K8

THE RECYCLING PROCESS AND HOW IT WORKS

Q Where does the recycled material go? What do your recycling partners do with it?

Once the non-recyclable parts of the used product (e.g. zippers) are removed, the remaining materials are shredded, densified, pelletized and then provided to manufacturers in North America who use it to create new products such as shelving, patio furniture and more.

We also direct a small portion of the material to be used in the creation of select promotional items that are used to build awareness for the program.

Q Do we know which manufacturers are using our pellets in their products? Where can my customers buy these products?

Our recycling partners work directly with manufacturers in North America to find suitable applications for our pellets. Our recyclers can provide us with the names of the manufacturers to share with you. However, there are times when a manufacturer puts the recycler under a non-disclosure agreement (NDA) to protect their proprietary formulations. In those cases, we may not be able to share information about the manufacturer directly with you.

If you would like more information about the products being manufactured with our pellets, please e-mail your request to RightCycle@ansell.com so we can provide you with the most current information.

Q How do I know that RightCycle is a legitimate landfill diversion solution?

We are transparent about the recycling process and provide you with details on what is occurring at every step of the process. Additionally, Ansell annually audits our recycling partners and verifies all process claims.

If you have further questions, please send a request for additional support to RightCycle@ansell.com. We can set up a time for you to speak directly with our RightCycle™ Team or put you in contact with other RightCycle™ customers who have volunteered to speak about the process and their experience with the program.

Q How do I know if RightCycle is working and how can I confirm how much waste I'm diverting?

You can track the amount of product and weight diverted from landfills by going to the [Wastebits online portal](#) and downloading simple graphs and exportable data. Additionally, each year, our Greenovation™ Awards honor companies for demonstrating sustainability leadership and reducing their environmental impact by participating in landfill diversion programs.

Q Is it possible to conduct an audit of your recycling facilities?

Yes. We can complete any audit paperwork you require. And, we are happy to hold in-person, on-site audits. Please submit your request to RightCycle@ansell.com.

Q Are there any tax benefits or financial incentives for participating in RightCycle?

Programs, credits, and incentives vary widely on a state-by-state basis in the U.S. and in Canada. Programs generally incentivize the recycling processors rather than the people who are generating the waste. We recommend that you check the guidelines in your state or province for information about any programs that may benefit your business.

Q Who can I contact with any additional questions?

Email your questions to RightCycle@ansell.com.
