

Supplier name: Ansell

Publication date: //2024.

Commitment to achieving Net Zero

Ansell is committed to achieving Net Zero emissions for direct operations (Scope 1 and 2) by 2040.

Baseline Emissions Footprint

Scope 1 and 2 emissions are measured for manufacturing plants only. Our distribution centres and offices are leased and therefore fall under scope 3 emissions. Scope 1 and 2 emissions targets relate to manufacturing plants only.

Baseline Year:	July 2019 – June 2020
EMISSIONS	TOTAL (tCO2e)
Scope 1	119,120
Scope 2	94,610
Total Scope 1 + 2 Emissions	213,730

Baseline Year:	July 2019 – June 2020
Additional Details relating to the Baseline Emissions calculations.	Our Scope 3 inventory is calculated by subject matter experts using a spend-based methodology. We used our financial data, industry averages and other emission factors based primarily on spend data. As we enhance our supply chain engagement and develop our scope 3 roadmap, we expect to improve the accuracy of our inventory with increased granularity and this may impact our baseline calculation as well.
EMISSIONS	TOTAL (tCO2e)
Scope 3	Scope 3 total – 858,203 Purchased Goods & Services - 401,410 Capital Goods - 14,320 Fuel & Energy Related Activities - 47,392 Upstream T&D - 71,075 Waste Generated in Operations - 5,471 Business Travel - 14,991 Employee Commute - 16,217 Upstream Leased Assets - 2,446 End of Life Treatment - 284,881
Total Scope 3 Emissions	858,203

Current Emissions Reporting

Reporting Year:	July 2022 – June 2023
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	116,031
Scope 2	76,120
Total Scope 1 + 2 Emissions	192,151

Reporting Year:	July 2021 – June 2022
EMISSIONS	TOTAL (tCO ₂ e)
Scope 3 (July 2021 – June 2022) (Included Sources)	Scope 3 total – 1,114,723 Purchased Goods & Services – 685,099 Capital Goods – 8,797 Fuel & Energy Related Activities – 49,973 Upstream T&D – 102,196 Waste Generated in Operations – 4,690 Business Travel – 3,579 Employee Commute – 12,877 Upstream Leased Assets – 1,951 End of Life Treatment – 245,610
Total Scope 3 Emissions	1,114,723

Emissions Reduction Targets

- Net Zero for Scope 1 and 2 by 2040 with a mid-term target of 42% (vs. FY20 base year).
- 100% Renewable Electricity by 2040 with mid-term target of 60% by 2030.
- All manufacturing plants to have certified Energy Management Systems (ISO 50001) by 2028

Carbon Reduction Projects

- We have completed the implementation of renewable electricity projects this year and made decisions to overcome inefficiencies in our new biomass technology.
- Achieved 29% renewable electricity
- Three Malaysian plants now source at least 90% of electricity from renewable sources through the Malaysia Green Electricity Tariff program.
- Ansell Textiles Lanka (ATL) is the first plant to achieve ISO 50001 certification.
- In support of the initiatives of Climate Group's RE100, Ansell commits to 100% renewable electricity by 2040 and supports EP100 by committing to establish ISO 50001-certified management systems at our manufacturing facilities by 2028.
- All manufacturing plants have achieved zero waste to landfill, except new plants in Malaysia (Ansell Seremban) and India (Ansell Kovai) as they were not part of our initial scope as they were not in full operation at the time.
- 70% of new products are designed with reduced environmental impact

- Our new paper band packaging significantly reduced more than 70% materials, and 82% GHG emissions from the primary packaging per 12-pair bundle. Ansell's SmartPack™ is the first surgical packaging to be certified for Grade A-AAA Recyclability
- Engaged with the IUCN to commence critical work in understanding our relationship with natural ecosystems and biodiversity

In the future we hope to implement further measures such as:

- Value chain partnerships and policy advocacy for climate and advancing for transition to zero carbon future
- Zero Waste to Landfill (ZWL) for all manufacturing plants
- By 2026, 80% of our new products are designed with reduced environmental impact Use less fossil materials, and more recycled and bio-based content materials
- Packaging goal: 100% of packaging material is recyclable, reusable or compostable by 2026
- Reduce water withdrawals by 35% by 2025 (2020 baseline)
- Improved environmental stewardship to reduce depletion and impacts on natural resources

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Augusto Accorsi
Chief Commercial Officer
