

SANDEL[®] COUNT IN PROGRESS BEACON

NEVER EVENT PROTECTION

A bright orange beacon designed to help reduce the risk of retained surgical items

Retained surgical items occur approximately 40 times a week in the U.S.¹ Forty-three percent of cases report interruptions during the count process.²

The Count In Progress beacon is designed to help reduce the risk of retained surgical items in the O.R. by eliminating distractions during the counting process.

KEY FEATURES & BENEFITS

- Notifies the surgical team that a count is about to begin
- Helps reduce distractions and unnecessary activity while the count is in progress
- Bright orange and highly recognizable

SANDEL[®] Anticipate the Unexpected

Developed in collaboration with clinical professionals, SANDEL products are designed to address key high-risk areas in the healthcare environment. Our signature bright orange products help reduce the risk of preventable injuries, errors and infections. SANDEL products equip caregivers with solutions to do their job safely while improving patient outcomes.
