

GAMMEX® Non-Latex

SURGICAL GLOVES

Neoprene, chemical acceleratorfree surgical gloves offer advanced allergy protection

- Advanced allergy protection: GAMMEX[®] Non-Latex neoprene surgical gloves are synthetic and eliminate risks of Type I latex allergy. These sterile gloves are made 100% free of chemical accelerators and minimize any risk of sensitization to allergens leading to allergic contact dermatitis.
- **Proven durability:** Strong neoprene glove film deliver the added hand protection needed for the most rigorous procedures
- Confident grip: These sterile gloves feature an external microtextured finish for firmer, more confident instrument handling
- Effortless donning: Ansell's donning aid technology includes an internal polymer coating that facilitate easy dry or damp donning
- Chemo-tested: In addition, these long-cuff gloves are tested against ASTM D6978 and recommended for the safe handling of chemotherapy drugs*

*Contact Ansell Customer Service for specific chemotherapy drug permeation times and recommendations

Recommended For

- Damp donning
- Protection from latex Type I allergy and minimize chemical Type IV allergies in HCW's or patients
- Tested for use with chemotherapy drugs

FEATURED TECHNOLOGIES

GAMMEX[®] Innovation that Protects

Driven by innovation, GAMMEX[®] surgical gloves are engineered to respond to the evolving user needs of the surgical community. Featuring unique formulations and cutting-edge technologies, ergonomic comfort and superior protection, healthcare workers around the world entrust their hands to ours.
