

**WRS**

Lightweight surface rescue suit

**Provides protection for personnel who are not divers, but are working on, near or above water.**

## Industries

- Surface Rescue

## Applications

- Flooding applications
- On water rescue
- Swift water rescue

## KEY FEATURES & BENEFITS

- Ideal for fire rescue teams, coastguard and environment agency teams
- Extremely lightweight, flexible, durable and puncture resistant material
- Unique “Vulca-Seam Technology” ensures watertight seams
- Smooth outer surface for easy cleaning
- Front entry, non adjustable torso, for ease of operation

## Seam Diagram

## Performance Standards

EN 14225-2:2017

## Product Information

| Product Information |                                                                                                                                               |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| Color               | Black legs with Yellow top                                                                                                                    |
| Country Of Origin   | Lithuania                                                                                                                                     |
| Product Material    | 255 g/m2 Nylon outer / Butyl rubber / Nylon inner material                                                                                    |
| Product Reference   | WRS                                                                                                                                           |
| Reinforcements      | The VIKING™ WRS material is inherently abrasion and puncture resistant. Additional reinforcements are fitted to knees and elbows as standard. |
| Seam Type           | Stitched and Taped                                                                                                                            |
| Available Sizes     | S, M, L, XL, 2XL                                                                                                                              |
| Standards Overview  | Regulation (EU) 2016/425, using applicable parts of EN ISO 15027-1:2017 and EN 14225-2:2017                                                   |

Suit Components & Accessories

| Suit Components and Accessories |                                                                                                                                                                              |
|---------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Design Features                 | Front entry with non-adjustable torso. No valves fitted. High visibility reflectors are fitted as standard to the zip flap, wrists, upper arms and back of legs.             |
| Neck Seal                       | Fitted with a Surveyor latex neck seal as standard. Option: VIKING™ Quick Neck system, which allows for quick changing of broken seals.                                      |
| Cuffs                           | Latex conical cuffs are the standard fitment. Options: A rubber cuff ring system or the VIKING™ Bayonet Ring System. Both systems make the fitment of latex gloves possible. |
| Footwear And Attachments        | Rubber coated 5 mm neoprene boots. The boots feature a non-slip outsole and a heel fin retainer. Alternative options are available.                                          |
| Zipper                          | Medium Duty (MD) non-magnetic; 85 or 90 cm long; placed diagonally across the upper body. The zipper is covered by a flap.                                                   |
| Included With Each Delivery     | Each suit comes supplied with suspenders, carry bag, user manual, repair kit and zip care materials.                                                                         |
