

## Heavy-duty neoprene gloves, designed with a double-insulating liner to resist extreme temperatures

- **Specialized protection:** AlphaTec® 19-026 neoprene gloves feature a double-insulating thermal liner, for heightened protection against thermal risks and hazards, including intermittent heat contact up to 180°C/356°F
- **Advanced defenses:** Unaffected by cleaning solutions and detergents, these AlphaTec® gloves' neoprene coating ensures advanced chemical resistance, offers mechanical protection and withstands oils and greases
- **Enhanced flexibility and grip:** In addition, they are flexible and offer excellent grip performance, ensuring secure handling and assured dexterity

### Industries

- Machinery and Equipment
- Metal fabrication
- Chemical
- Automotive Aftermarket

### Applications

- Press work
- Handling materials with sharp or rough edges
- Production line support & maintenance
- Unexpected leakages spills or other releases

Previously known as: Scorpio™ 19-026

### Key Features

- **Double-insulating thermal liner:** Resistance to both hot and cold\*
- **High-grade neoprene coating:** Excellent chemical and mechanical protection
- **Flexible, grip-enhancing design:** Greater dexterity, more secure handling

\*protection from intermittent contact with hot surfaces up to 180°C/356°F

### Performance Standards

CE 0493

### Specifications
