

Heavy-duty high-dexterity gloves, offering superb grip for handling wet or oily components

- **Strengthened grip:** AlphaTec™ 58-435 protective gloves feature an ANSELL GRIP™ Technology coating polymer, which enables more secure control when handling oily or wet objects and reduces hand fatigue in doing so
- **Improved durability:** Thanks to their 0.7mm/27 mil unlined nitrile shell, these robust safety gloves offer superior resistance to snags, punctures and abrasion
- **Specialized protection:** Their nitrile protective barrier also means they guard against various chemicals, including hydrocarbon derivatives, alcohol bases and many solvents and esters
- **Enhanced features:** A longer version of the AlphaTec™ 58-430, AlphaTec™ 58-435 hand protection gloves feature the same foldable gutter cuff, to prevent dripping onto the forearm, as well as an extra-long cuff, for added forearm and wrist protection
- **Food handling compliance:** Compliant with relevant FDA requirements, they may also be used as food safety gloves, for a range of food processing applications

Industries

- Automotive
- Metal fabrication

Applications

- Warehousing of raw materials
- Touching up
- Transferring liquids and solids between vessels and tanks and process equipment
- Painting or cleaning tools or robots
- Opening furnaces draining pumps valves or lines and crackers BTX process
- Metalworking & assembly operations
- Body painting including surface inspection

AlphaTec™

58-435

Confident Grip Performance with enhanced flexibility

Key Features

- ◆ ANSELL GRIP™ Technology: Greater grip, lesser hand fatigue
- ◆ 0.7mm/27 mil unlined nitrile shell: Optimized abrasion resistance
- ◆ Nitrile protective barrier: Enhanced chemical resistance*

*effective against hydrocarbon derivatives, alcohol bases, many solvents and esters

Vulcanization Chemical Accelerators

- Zinc Diethyldithiocarbamate

Only a very small number of users may be sensitive to this ingredient(s) and hence may develop irritant and/or allergic contact reactions.
