

# GAMMEX™ Non-Latex PI

## SURGICAL GLOVES

### Soft, skin-friendly polyisoprene surgical gloves, for optimal comfort and allergy protection

- **Optimal allergy protection:** Being non-latex, these polyisoprene surgical gloves eliminate the risk of a latex allergy while minimizing sensitization to a Type IV chemical allergy as chemical accelerators known to cause skin allergies have been eliminated from its skin-friendly formulation
- **Superior comfort and dexterity:** Ansell's proprietary soft yet strong formulation delivers exceptional fit and feel
- **Excellent grip and sensitivity:** The smooth surface of these surgical gloves has a micro-textured finish to ensure confident handling and instrument grip during the most rigorous procedures
- **Effortless donning and doffing:** A unique internal coating aids dry and damp hand donning, either when first donned or during intra-operative changes
- **Chemo-tested:** Tested to ASTM D6978, these GAMMEX® sterile gloves are safe to use with a wide range of chemotherapy drugs\*\*

\*\*Contact Ansell Customer Service for specific chemotherapy drug permeation times and recommendations

### Recommended For

- All surgeries, especially high risk procedures in orthopaedics, trauma, and cardiac
- Extra comfort during long, sustained procedures
- Protection from chemical accelerators such as thiurams, carbamates and mercaptos known to cause chemical Type IV allergies
- Having passed the Mouse Embryo Assay (MEA) test, may be used for In Vitro Fertilization (IVF) procedures

### FEATURED TECHNOLOGIES

### GAMMEX® Innovation that Protects

Driven by innovation, GAMMEX® surgical gloves are engineered to respond to the evolving user needs of the surgical community. Featuring unique formulations and cutting-edge technologies, ergonomic comfort and superior protection, healthcare workers around the world entrust their hands to ours.
