

# GAMMEX® Latex Ortho

S U R G I C A L   G L O V E S

## Ultra-thick powder-free latex gloves designed to withstand rigors of surgery using power tools

- **Added protection:** These brown color surgical gloves are powder-free and made 50% thicker\* than Ansell's standard latex gloves using Ansell's extra-thick formulation, making them suitable for high-risk procedures such as ortho surgery to protect wearers from power tools and bone fragments
- **Exceptional grip:** GAMMEX® Latex Ortho powder-free sterile gloves feature textured fingers and palm for secure grip when handling power tools under dry or damp conditions
- **Effortless donning:** Ansell's unique donning aid technology enables a polymer coating to be applied on the inside of the glove for easy donning and doffing, be it the first don or during intraoperative changes
- **Chemo-tested:** These sterile latex surgical gloves are tested per ASTM D6978 and may be used with a wide range of cytotoxic agents\*\*

CAUTION: Safe use of these gloves by latex-sensitized individuals has not been established. This product contains natural rubber latex, which may cause allergic reactions.

*\*Compared to Ansell's standard latex gloves*
