Boosts precision and productivity with second-skin comfort in an ANSI A9/ISO F+ -rated glove

- **Second-Skin Design:** Engineered with AEROFIT™ Technology, an innovative, flexible foam nitrile coating that delivers improved tactility, sensitivity and a more comfortable, breathable glove feel.
- **Premium Comfort:** Our thinnest nitrile multi-purpose glove for all-day wear. Overwhelmingly preferred for precision handling*.
- **Proven Productivity:** Testing showed that users wearing HyFlex safety gloves with AEROFIT™ Technology completed precision tasks faster than when using comparable gloves on the market*.
- **Certified Skin Safety:** Dermatologically tested, free from harmful substances. Each pair is post-washed for clean, skin-safe wear.
- **Touchscreen Compatibility:** Enables seamless interaction with most touchscreen devices while keeping gloves on.

* Based on a survey of 52 glove wearers comparing Ansell gloves to the competitive gloves available on the market (May 2025); testing conducted with 11-844 gloves. Results may vary across other gloves in the series.

Industries

- Aerospace
- Automotive
- Metal fabrication
- Food Processing

Applications

- Handling metal sheets & panels
- Handling structural and body components
- Metalworking & assembly operations
- Adjusting systems and screwing
- Changing tools and dies
- Handling materials with sharp or rough edges

HyFlex®

ADVANCED MECHANICAL PROTECTION

11-814

High-tactility glove with extreme cut resistance

Key Features

- ♦ **AEROFIT™ Coating:** up to 30% thinner* for exceptional tactility and control.
- ♦ **Highly Breathable Liner:** delivers premium comfort for all-day wear.
- ♦ **Productivity-Enhancing Design:** enables faster, more precise work.

* Versus standard Ansell glove with the same level of protection
