

ENCORE™ Latex Underglove

S U R G I C A L G L O V E S

Powder-free latex undergloves, designed for double gloving during surgical procedures

- **Enhanced safety:** The ENCORE® Latex Underglove is surgical green in color, contrasting with most outer gloves and making glove breaches easier to detect
- **Improved comfort and hydration:** These powder-free latex gloves also feature an internal coating, designed with HYDRASOFT™ Skin Moisturizing Technology**, retaining moisture and rehydrating the skin
- **Effortless donning and doffing:** Their DERMASHIELD™ Technology inner coating and low-friction outer surface make these sterile gloves easy and comfortable to don and remove in dry and damp conditions, facilitating double gloving and intra-operative changes

**contains glycerol and dimethicone moisturizing agents

CAUTION: Safe use of these gloves by latex-sensitized individuals has not been established — this product contains natural rubber latex, which may cause allergic reactions

Recommended For

- All surgeries, especially high risk procedures in orthopaedics, trauma, and cardiac
- Damp donning
- Easy identification of a glove breach
- Use as an underglove when double gloving
