

GAMMEX™ Latex Sensitive

S U R G I C A L G L O V E S

Latex, powder-free surgical gloves designed for superior tactile sensitivity and dexterity

- **Heightened tactile sensitivity:** The soft formulation combined with a unique process has resulted in a powder-free latex glove that is 20% thinner than Ansell's standard latex range offering an ideal balance of tactile sensitivity and dexterity
- **Elevated comfort:** These sterile surgical gloves also offer exceptional wearer comfort and protection thanks to its soft yet strong formulation
- **Enhanced grip:** The external surface is smooth with a micro-textured finish for secure handling of surgical instruments even in wet conditions
- **Reduced eye fatigue:** These latex gloves are brown in color to help prevent eye fatigue from surgical glare
- **Tested for chemo handling:** GAMMEX™ Latex Sensitive powder-free gloves are tested in accordance with ASTM D6978 and can be safely used with a range of chemotherapy drugs**

CAUTION: Safe use of these gloves by latex-sensitized individuals has not been established. This product contains natural rubber latex, which may cause allergic reactions.

**Contact Ansell Customer Service for specific chemotherapy drug permeation times and recommendations

Recommended For

- Prevention of eye fatigue
- All surgeries, especially delicate procedures in ophthalmology, micro, and cardiovascular
- Enhanced tactile sensitivity and dexterity, especially for delicate procedures
- Extra comfort during long, sustained procedures
