

GAMMEX® Latex Ortho

SURGICAL GLOVES

Ultra-thick powder-free latex gloves designed to withstand rigors of surgery using power tools

- Added protection: These brown color surgical gloves are powderfree and made 50% thicker* than Ansell's standard latex gloves using Ansell's extra-thick formulation, making them suitable for high-risk procedures such as ortho surgery to protect wearers from power tools and bone fragments
- Exceptional grip: GAMMEX[®] Latex Ortho powder-free sterile gloves feature textured fingers and palm for secure grip when handling power tools under dry or damp conditions
- Effortless donning: Ansell's unique donning aid technology enables a polymer coating to be applied on the inside of the glove for easy donning and doffing, be it the first don or during intraoperative changes
- Chemo-tested: These sterile latex surgical gloves are tested per ASTM D6978 and may be used with a wide range of cytotoxic agents**

CAUTION: Safe use of these gloves by latex-sensitized individuals has not been established. This product contains natural rubber latex, which may cause allergic reactions.

*Compared to Ansell's standard latex gloves

**Contact Ansell Customer Service for specific chemotherapy drug permeation times and recommendations

Recommended For

- All surgeries, especially high risk procedures in orthopaedics, trauma, and cardiac
- Damp donning
- Enhanced grip in wet environments

FEATURED TECHNOLOGIES

GAMMEX[®] Innovation that Protects

Driven by innovation, GAMMEX[®] surgical gloves are engineered to respond to the evolving user needs of the surgical community. Featuring unique formulations and cutting-edge technologies, ergonomic comfort and superior protection, healthcare workers around the world entrust their hands to ours.
