

Previously known as: VibraGuard® 07-112

Vibration

Heavy Duty

Nitrile-coated anti-vibration work gloves, minimizing the effects of harsh vibrations

- **Optimized versatility:** Beyond granting snag and abrasion resistance, the full-fingered ActivArm® 07-112 heavy-duty gloves are finished with fully impregnated nitrile coating
- **Maximized protection:** Thanks to their Ansell Vibration Foam Gel padding, these protective gloves guard against hand and finger injuries (including hand-arm vibration syndrome, or HAVS) due to prolonged vibration exposure and are ideal for tasks involving vibrations at frequency levels over 300Hz
- **Reduced surface defect risks:** Being silicone-free, they create a lesser risk of contaminant transfer to metal before painting
- **Extended glove life:** ActivArm® 07-112 hand protection gloves are also machine washable, for longer wear

Industries

- Automotive
- Metal fabrication
- Agriculture
- Automotive Aftermarket
- Oil and gas

Applications

- Handling metal sheets & panels
- Metalworking & assembly operations
- Handling rough machined metal parts
- Handling materials with sharp or rough edges

Previously known as: VibraGuard® 07-112

Key Features

- **Nitrile coating:** Shock-absorbent safety gloves
- **Ansell Vibration Gel Foam padding:** Reduced vibration transmission
- **Silicone-free design:** Reduced risk of surface defects

Performance Standards & Regulatory Compliance
