

38-612Maximum protection from hazardous chemicals

Previously known as: ChemTekTM 38-612

Butyl and viton gloves, offering wearers advanced protection against chemical hazards

- Optimized protection: Featuring a 0.3mm butylviton layer, these AlphaTec[®] 38-612 industrial gloves offer advanced chemical resistance, protecting against aliphatic, halogenated and aromatic hydrocarbons, as well as concentrated mineral acids
- Advanced ergonomics: These hand protection gloves are designed with a naturally curved ergonomic shape, which enhances comfort, ensures dexterity, and makes donning and doffing easier
- Improved comfort: Thanks to their soft feel, AlphaTec[®] 38-612 safety gloves are even more comfortable, facilitating sustained wear

- Automotive
- Life Sciences
- Chemica
- Emergency Medical Services

Applications

- Inspection, selecting, checking parts
- Loading and unloading of proces equipment
- Handling incoming goods
- Transferring liquids and solids between vessels and tanks and process equipment
- Supervision of running operation
- Unexpected leakages spills or other releases
